

# Web Development – Mr. Turner

## Project – Project Title

### **Project Overview**

Description of the page or site and its primary function.

### **Display**

The list below includes the essential elements of the page.

- Display Features

### **Functionality**

A description of how the page operates.

### **Enhancements**

Features that more advanced students can add to the page.

### **Programming Skills**

For a level 5 project, a student must demonstrate competence with advanced CSS and manipulation of the box model. When coming up with your idea and designing your spec sheet, please keep this in mind.

Please make sure to submit a copy of your final spec sheet for approval ***before*** beginning your project.
